Drawing from Territory

Research and practices in art, science and technology

<https://conferencias.damath.ucp.pt>

International Conference 23rd - 25th November 2026
Vila Nova de Cerveira, Portugal

Rooted in a border territory between Vila Nova de Cerveira, in Northern Portugal, and Galicia, the initiative explores great territory-based issues, with particular attention to border regions as spaces of negotiation, permeability, exchange, and tension. Drawing from Territory invites STEM, artists, designers, scientists and other researchers working across different fields of knowledge to engage with drawing as a shared language and transverse discipline – one capable of bringing together research and practice.

Call for Abstracts - 15 May
