

PhD Position in Theoretical Particle Physics at the Karlsruhe Institute of Technology (KIT)

The PhD position is offered within the Collaborative Research Center (CRC) Particle Physics Phenomenology after the Higgs Discovery, TRR 257 (<https://p3h.particle.kit.edu/>) by Prof. Mühlleitner at the Institute for Theoretical Physics (ITP). Applicants should have experience in particle physics phenomenology, with special interest in higher-order corrections and physics beyond the Standard Model. A Master's degree in physics is required to start the PhD position. In addition, applicants should not have a PhD yet and should be in their first four years after their Master's degree. Applications (including a research statement, a list of publications and CV as well as two letters of recommendation) should be submitted by email directly to Prof. Mühlleitner (milada.muehleitner@kit.edu). If needed, please contact Prof. Mühlleitner for further detailed information.
