

TEACHING GUIDE ON  
ADVANCED QUANTUM FIELD THEORY

---

MASTER MODULE	SEMESTER	CREDITS	COURSE TYPE
Particle Physics and Astrophysics	1	6	Optative
PROFESSOR(S)	CONTACT DETAILS		
<ul style="list-style-type: none"> <li>• Manuel Pérez Victoria Moreno de Barreda</li> <li>• Roberto Vega-Morales</li> </ul>	Departamento de Física Teórica y del Cosmos, Edificio Mecenas, Campus de Fuentenueva s/n, Universidad de Granada, 18071-Granada  TLF: 958-2(EXT) MPV: mpv@ugr.es, EXT: 49063 RVM: rvegamorales@ugr.es, EXT: 49999		
TUTORIALS TIMETABLE			
			www.ugr.es/~fteorica/Docencia/Tutorias.html
MASTER DEGREE			
University Master in Physics: Radiations, Nanotechnology, Particles and Astrophysics, University of Granada			
TEACHING DATES AND TIMES			
PRE-REQUISITES FOR REGISTRATION			
Basic knowledge of Field theory and particles, Quantum mechanics and Mathematical methods for physics			
BRIEF CONTENTS DESCRIPTION			
Introduction to the most relevant theoretical aspects of particle physics			
PROGRAM			
<b>PART I. BASIC FORMALISM. PATH INTEGRALS.</b> <ul style="list-style-type: none"> <li>• Introduction. Review of canonical quantization.</li> <li>• Path integral in quantum mechanics.</li> <li>• Functional quantization of scalar fields.</li> <li>• Interacting fields. Perturbation theory and Feynman diagrams.</li> <li>• Functional quantization of fermionic fields.</li> <li>• Functional quantization of the electromagnetic field.</li> </ul>			

- Effective action and Schwinger-Dyson equations.
- LSZ formula. Optical theorem. Unstable particles. Dispersion relations.

## PART II. SYMMETRIES

- Noether theorem and Ward identities.
- Spontaneous breaking of global symmetries.
- Gauge theories.
- Quantization of gauge theories. BRST symmetry.
- Spontaneous breaking of local symmetries.
- Anomalies.
- Monopoles and instantons.

## PART III. RENORMALIZATION

- Divergences and regularization.
- Renormalization.
- Renormalizability. Effective theories.
- Wilsonian renormalization group flows.
- Renormalization group equation in renormalizable theories.
- Evolution of couplings. Asymptotic behaviour.
