Título: "IHP in a nutshell"

Ponente: Prof. Peter Langendörfer, director del Dept. de Wireless Systems and IHP (Leibniz Institute for High Performance Microelectronics) de

Abstract: In this talk, I will provide an overview of AI as an enabler for understanding and processing scientific results presented later. AI is considered to be a key enabler for many new challenging applications. I will provide an insight into fields such as AI in health, AI in space and AI for security. The focus is not on AI as such but on how to use it on resource constrained devices .
