

Important notice regarding the double degree with UNIPD

12/04/2023

Due to the legislative changes currently taking place in Italy, regarding the requisites to work as a psychologist in the Italian territory, the terms of the bilateral agreement are in the process of being renegotiated. For that reason, we cannot currently guarantee that the double degree option will be available for the academic year 2023-2024.

That does not affect the normal functioning of the Master Degree at the University of Granada, nor the students who have already started their double degree study plan.

The terms and conditions in which the double degree is operative for the current academic year (2022-2023), including the study plan, can be found [here](http://masteres.ugr.es/neurocg/).
