Section B. SUMMARY OF THE CURRICULUM

Juan J. Díaz-Mochón holds a PhD in Pharmacy from the University of Granada. In 2002 he began a post-doctoral stay at the Combinatorial Center of Excellence in Southampton (England) which lasted until 2005. That year he joined the Mark Bradley Group as Senior Researcher at the University of Edinburgh (Scotland). In 2008, he obtained his first project as an IP that allowed him to develop the use of dynamic chemistry for reading DNA, being the inventor of the patent that protects this technology. In 2010 he founded DestiNA Genomics Ltd. in Scotland with the aim of exploiting this patent, being founding partner, CSO and Director. At the end of 2011, he joined the University of Granada as a Ramón y Cajal Researcher working in the NanoChembio Research Group whose research laboratory is located in the GENYO Center located in the Health Sciences Technology Park (PTS). Pomegranate. As of 2017, he occupies a position as an indefinite hired doctor with accreditation as a full professor. The NanoChembio research group will be involved. In this field, he coordinates several multidisciplinary and intersectoral projects focused on the development of chemical and biotechnological platforms, such as the development of new diagnostic tools based on nucleic acid detection, SMART biomaterials for cellular and protein modulation, and the design and synthesis of enzymatic inhibitors as antitumor agents. and antiparasitics, preparation of molecular sensors for the detection and molecular characterization of CTCs for the

prognosis and diagnosis of cancer. In 2012, he helped incorporate DestiNA Genomica S.L. in Spain as a subsidiary of the Scottish company. DestiNA successfully closed a capital increase of € 1.2m in July 2015. Dr. Diaz Mochón is a member of the organizing committee of the First International Symposium on LIQUID BIOPSIES 2016 and co-founder of the International Society of Liquid Biopsy.
