

Date of the CVA	15/11/2018
-----------------	------------

Section A. PERSONAL DATA

Name and Surname	Carmen Ramos Martin		
DNI		Age	43
Researcher's identification number	Researcher ID	G-6267-2012	
	Scopus Author ID		
	ORCID		

A.1. Current professional situation

Institution	FUNDACION MEDINA		
Dpt. / Centre			
Address			
Phone		Email	carmen.ramos@medinaandalucia.es
Professional category	Principal Scientist		Start date 2016
UNESCO spec. code	249000 - Neurosciences		
Keywords	Molecular mechanism of disease; Cell culture; Cell biology; Molecular biology		

A.2. Academic education (Degrees, institutions, dates)

Bachelor/Master/PhD	University	Year
PhD, Biochemistry and Molecular Biology	Autonomous University of Madrid	2004
Pedagogical Adaptation Course (CAP)	Complutense University of Madrid	2004
BS, Biochemistry and Molecular Biology	Autonomous University of Madrid	1998

A.3. General quality indicators of scientific production

Total citations = 229; average citation per article= 22.9; h-index = 7

Section B. SUMMARY OF THE CURRICULUM

Currently, I am working in Fundación MEDINA, as Principal Scientist in Screening and Cell culture Area, where I am developing drug screening programs in the field of cancer [Ramos et al., 2017] and neuronal diseases, efficacy studies and target validation in vitro and in vivo.

Throughout my PhD period, in the Centre of Molecular Biology "Severo Ochoa" of the Autonomous University of Madrid, I received training about molecular genetic (PCR, RT-PCR, cloning, EMSA) and cell biology techniques (cell culture, established cell generation, primary cells isolation, western blot, ELISA, immunocytochemistry) [Bullido et al., 2004; Ramos et al., 2005]. Additionally, I gained experience in biological samples handling and in conducting case-control genetic studies [Bullido et al., 2000, Ramos et al., 2006]. The dissertation of my PhD was about Molecular Bases of Alzheimer's disease.

Thereafter, I started working in a biotech company, Neuron Bio (Granada), where I was in charge of the organization and establishment of the cell culture laboratory, implementing control and safety systems. The aim of this period was the discovery of neuroprotective, antioxidant and anti-inflammatory compounds through thousands of screening assays, as a result of which several patents have been generated. In the last five years as Senior Researcher in NeuronBio, I participated in three projects with public funding as principal researcher. In that years I acquired knowledge about computational approaches for drug discovery and development and about methodologies such as the generation of cell models of disease, high throughput techniques, real-time cell monitoring technology, flow cytometry, fluorescence microscopy and DNA arrays [Sierra et al., 2011; Ramos et al., 2012]. Moreover, I have used zebrafish as a research model [Alfaro et al., 2010].

Furthermore, I have experience in the implementation and management of R&D in compliance to UNE166002, in the research with experimental animals according to RD 53/2013, in Intellectual Property management and in the use of alternative models to experimental animals.

Section C. MOST RELEVANT MERITS (ordered by typology)

C.1. Publications

- 1 **Scientific paper.** Boulaiz H; et al. (6/2). 2017. What's new in the diagnosis of pancreatic cancer: a patent review (2011-present) Expert Opinion on Therapeutic Patents. Epub ahead of prin. ISSN 1744-7674.
- 2 **Scientific paper.** Ramos MC; et al. (5/1). 2017. What's new in treatment of pancreatic cancer: a patent review (2010-2017) Expert Opinion on Therapeutic Patents. Taylor & Francis Group. 27-11, pp.1251-1266. ISSN 1354-3776.
- 3 **Scientific paper.** Ramos, Maria C.; et al. (5/1). 2012. Simvastatin Modulates the Alzheimer's Disease-Related Gene seladin-1 Journal of Alzheimers Disease. 28-2, pp.297-301.
