Campus:	<input checked="" type="checkbox"/> Paris <input type="checkbox"/> Bordeaux <input type="checkbox"/> Chambéry <input type="checkbox"/> London <input type="checkbox"/> San Francisco
Module hours:	<b>45</b>
ECTS credits:	<b>5</b>
Teaching language:	<input type="checkbox"/> French <input checked="" type="checkbox"/> English

**1. Module description**

---

This module deals with concepts, methods, and applications of modeling tools to support strategic and tactical marketing decision making, and will further equip you with the knowledge of marketing and strategy in an international context.

**2. Learning objectives**

---

The objectives of this course include the following: 1) To help students understand how analytical techniques and computer models can enhance decision making by converting data and information into insights and decisions. 2) To help students learn to view marketing phenomena and processes in ways that are amenable to decision modelling. 3) To expose students to a number of examples of the successful use of marketing engineering. 4) To provide you with a software toolkit that will enable you to apply marketing engineering to real marketing decision problems.

**3. Prerequisites**

---

The students should have some general knowledge about marketing, although in the beginning of the course general principles of marketing will be briefly reviewed.

**4. Teaching methods**

---

Lecture    Introductory seminar    Tutorial    Conference    E-learning

**1. Module description**

---

In this module, you will learn how marketing is essential throughout all phases of innovation. You will explore the entire product-development process, from identifying customer needs to generating concepts, to prototyping and design to product launch, and understand the critical importance of measuring and evaluating companies' marketing activities.

**2. Learning objectives**

---

To provide marketers who aim to develop new products and those that manage marketing or will have responsibility for the marketing function with an understanding of the tools and approaches that can be used to measure the effectiveness of marketing expenditures and the understanding of how to assess and communicate the returns from marketing spending to management. Specifically, participants will leave this course knowing: 1) How to determine which marketing metrics are the most appropriate for their industry (i.e., consumer-packaged goods, services, on-line, etc.). 2) How to assess the marketing data available to them as input metrics. 3) How to calculate the most relevant output metrics. 4) How to develop additional sources of data as required by firm management. 5) How to implement a marketing measurement program/dashboard in their business or firm/company. 6) In addition participants will be better able to identify and manage resources outside of their business or firm/company and to assist, if needed, in developing and implementing a measurement system with dashboard/flow board.

**3. Prerequisites**

---

The students should have some general knowledge about marketing, although in the beginning of the course general principles of marketing will be briefly reviewed.
