

Teresa GARCÍA-MUÑOZ

Associate Professor

Department of Quantitative Method (FCCEE)

PhD University of Granada, 2001

- Research:
 - Area of interests: subjective well-being, subjective health, happiness and economics of religion
 - Webpage: <http://www.ugr.es/~tgarciam/>
- Contact details:
 - Office: C.102
 - Tutorial hours: Tuesday and Wednesday 9:30-10:30, 12:30-14:30
 - Phone number: 958 241956 / email: tgarciam@ugr.es

Research Methods in Macroeconomics (Time Series) (2nd Trimester)

- ¿For who? For students interested in econometrics and in studying evolution of macroeconomic and financial variables.
- At the end of the course, student will be able to:
 - Explain the fundamental techniques of the time series.
 - Identify and know how apply these techniques correctly.
 - Classify variables, parameters, relationships and models.
 - Describe the meaning of each model assumptions.
 - Explain the meaning of the model parameters.
 - Set up and solve hypothesis tests concerning the parameters of the model.
 - Use tools to perform estimation and model validation.
 - Learn to do scientific work in this field.
- Prerequisites: basic knowledge of Statistics and Econometrics.
- Assessment: Exercises and problems solved in class or individually (25%); Class attendance and contributions of students in discussion sessions and attitude of students in the different activities (25%); Report (50%).

Topics proposal for Master Thesis (TFM)

- Topics related with subjective well-being, subjective health, happiness, economics of migration and economics of religion.
- Proposals:
 - The role of religiosity in immigrants' well-being
 - Evolution of “Healthy immigrant effect” in Europe
 - Is there a “Happy immigrant effect” in Europe?
- Prerequisites:
 - Interest in research in the topic
 - Basic knowledge of statistic and econometrics
 - Methodological courses recommended
